

Mandarins & Mavericks:

Remembering Western Mining 1933-2005

by Martin Summons

\$59.95

Mandarins & Mavericks tells a great Australian story of drive and endeavour on the part of the people who built and sustained the company Western Mining Corporation from its origins in 1933.

Drawing on meticulously kept archives as well as the voices of many of the individuals involved, the book traces the company's progress throughout its seventy-two years – from its humble start in a corporate world

very different from the one we know today to its eventual ranking as one of Australia's leading exploration, mining and processing conglomerates.

Mandarins & Mavericks is complemented by an online archive, available through the National Library of Australia, which grants access and insight into the company's activities that would otherwise be unavailable.

"In Australia no mining company was more adventurous and innovative than Western Mining Corporation"
– **Professor Geoffrey Blainey**

"The expansion [of WMC] was a metaphor for the growth of the mining industry, now so important to our economy, in the 1970s and 80s." – **The Hon. John Howard**

"The WMC story is a story of people. One of the characteristics of WMC people was their loyalty to the company. While the company no longer exists, the loyalty continues." – **Sir Arvi Parbo**
